Re: BC Registries' Physical Files Temporarily Unavailable

On Thursday, September 15, 2022, the file storage facility at BC Registries in Victoria, experienced a major flood event. This event has impacted BC Registries operations as the storage facility is now undergoing flood remediation.

Physical files numbered 493002 to 871768 (and possibly others) will be temporarily unavailable during these remediation activities. We anticipate that we will have access to these files again, by the end of October 2022.

If you have any questions or would like to be notified when the files return to service, please email varek.boettcher@gov.bc.ca.

Thank you for your patience and understanding.
